Junior UX designer and front-end developer committed to utilizing my skills to further the mission of a company. Nearly Trilingual, hardworking, and ready to join my next team. Able to effectively self-manage during independent projects, as well as collaborate as part of a productive team.

Education

Computer Scientist
CBM Projektmanagement GmbH
April 2019 - Januar 2021

UX Design
Google certified via coursera
July 2021- September 2021 (3 mos)

Relevant Experience

Software Developer
FORTIS IT-Services GmbH
Mar 2020 - Jan 2021 (11 mos)
During the internship I helped developing an in-house Web Application using Angular. Together with the other intern I planned and coded the Web App, worked on both the Front- and Backend. I also developed the data structure of the WebApp.

Skills

I am able to plan a project with good user experience and user interface. I am familiar with conducting usability studies and general user experience research. After sketching, ideating, wireframing and prototyping I then begin to develop the App. I am able to code Front- and Backend, but am more comfortable on the front. My current coding and UX design skills are mostly self taught, a fact I am very proud of. I am able to teach myself if I am unfamiliar with a topic.
